1.0 Technical Documentation

Most of the source code is written in Java and has JavaDoc style comments attached to it. You can generate the JavaDoc for our code that is located within this folder (*05_documentation*). There is a significant amount of files.

Unzip the javadocfiles.zip and you will see the following:

Name	Date modified	Type	Size
com	3/29/2017 1:53 PM	File folder	
index-files	3/29/2017 1:54 PM	File folder	
allclasses-frame.html	3/29/2017 1:54 PM	Chrome HTML Do...	6 KB
allclasses-noframe.html	3/29/2017 1:54 PM	Chrome HTML Do...	5 KB
constant-values.html	3/29/2017 1:54 PM	Chrome HTML Do...	743 KB
deprecated-list.html	3/29/2017 1:54 PM	Chrome HTML Do...	4 KB
help-doc.html	3/29/2017 1:54 PM	Chrome HTML Do...	9 KB
index.html	3/29/2017 1:54 PM	Chrome HTML Do...	3 KB
overview-tree.html	3/29/2017 1:54 PM	Chrome HTML Do...	15 KB
package-list	3/29/2017 1:54 PM	File	1 KB
script.js	3/29/2017 1:54 PM	JavaScript File	1 KB
serialized-form.html	3/29/2017 1:54 PM	Chrome HTML Do...	6 KB
stylesheet.css	3/29/2017 1:54 PM	Cascading Style Sh...	14 KB

Navigate to `javadocfiles/index.html` to view the all the documentation(shown below)

The screenshot shows the Javadoc documentation for the `portfolioActivity` class. On the left, a sidebar lists all classes in the project, with `portfolioActivity` highlighted. The main content area displays the class hierarchy, implemented interfaces, and a nested class summary. The class `portfolioActivity` is shown as a public class that extends `android.support.v4.app.Fragment`. The nested class summary lists `android.support.v4.app.Fragment.InstantiationException` and `android.support.v4.app.Fragment.SavedState`. The constructor summary shows a single constructor `portfolioActivity()`.

```
com.example.stockers

Class portfolioActivity

java.lang.Object
    android.support.v4.app.Fragment
        com.example.stockers.portfolioActivity

All implemented interfaces:
android.content.ComponentCallbacks, android.view.View.OnCreateContextMenuListener

public class portfolioActivity
    extends android.support.v4.app.Fragment

Nested Class Summary

Nested classes/interfaces inherited from class android.support.v4.app.Fragment
    android.support.v4.app.Fragment.InstantiationException, android.support.v4.app.Fragment.SavedState

Constructor Summary

Constructors
Constructor and Description
portfolioActivity()
```

On the left side is the list of all classes you can navigate through. Comments have been added and can be viewed on these pages.

2.0 Setting up the Application

Setting up the application is complicated. You must download the latest version of Android Studio and create an emulator via the AVD manager icon on the top of android studio.

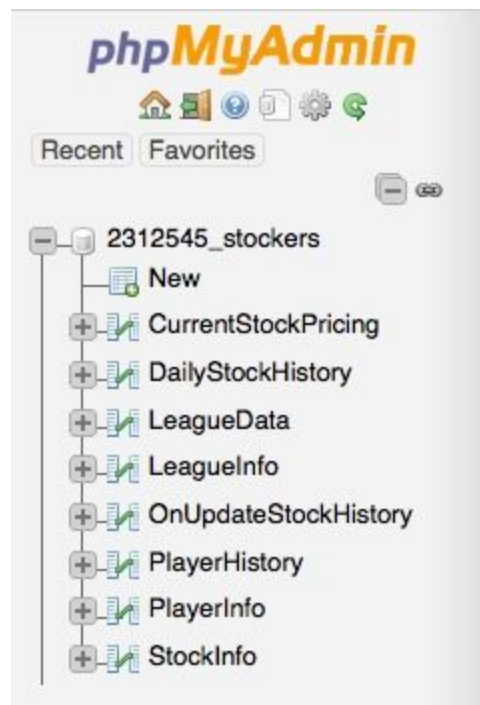

The screenshot shows the Android Studio interface. The top toolbar contains various icons, including the AVD Manager icon (a green play button with a device icon). The AVD Manager window is open, displaying a table of virtual devices. The table has columns for Type, Name, Resolution, API, Target, CPU/ABI, Size on Disk, and Actions. Three devices are listed: Ashwin2 API 23, Nexus 5 - Ashwin API 23, and Nexus 5 API 23. The 'Create Virtual Device...' button is highlighted in the bottom left corner of the AVD Manager window.

Type	Name	Resolution	API	Target	CPU/ABI	Size on Disk	Actions
Android	Ashwin2 API 23	1080 x 1920: 420dpi	23	Android 6.0 (Google APIs)	x86_64	4 GB	▶ ↕
Android	Nexus 5 - Ashwin API 23	1080 x 1920: 420dpi	23	Android 6.0 (Google APIs)	x86_64	4 GB	▶ ↕
Android	Nexus 5 API 23	1080 x 1920: xhdpi	23	Android 6.0 (Google APIs)	x86_64	4 GB	▶ ↕

Then download the APK file that is provided within this directory and simply drag and drop the .apk file into the emulator.

3.0 Database Structure

We are using phpMyAdmin for our database and hosting the database on a server called awardspace. The database consists of several tables as shown below.

A screenshot of the stock info table is shown below.

+ Options

CompanyName	Ticker	Price	Date	Time	ChangePercent	Volume	Year	Open	Cap	PE	DPS	EPS	High
